Performance™
SERIES

Reliable Heating with 80% AFUE

Things to Consider Before You Buy

Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. Your Carrier® dealer can help you choose the best system for your home, including a Performance™ Boost 80 gas furnace and Carrier-exclusive features that further enhance your indoor environment.

- Your furnace plays an important role during the cooling season by circulating cool air throughout your home. The Performance Boost 80 goes one step further and can increase the energy efficiency of selected 13.0- and 14.0-SEER Carrier air conditioners up to 1.5 SEER.* Add a Carrier Edge® Thermidistat™ Control and offer SmartEvap™ technology, a feature that works with your air conditioner to provide a comfort boost by helping keep humidity levels low.
- Want to enjoy better comfort during the day but conserve energy at night? Customize your home's indoor environment to your household needs and personal preferences using the programmable Edge Thermidistat Control's seven-day programmable schedule.
- Add a compatible Carrier thermostat and enjoy ComfortFan™ technology which gives you even more control over your indoor comfort by allowing you to select your continuous fan speed at the thermostat.

Performance Boost

The Carrier Performance Boost 80 gas furnace does a great job delivering quiet, efficient and warm winter comfort. As a part of your total indoor comfort system, it continues to play a vital role during the cooling season as well. The Performance Boost 80 furnace can help selected 13.0 and 14.0 SEER Carrier air conditioners achieve added energy efficiency up to 1.5 SEER.* It's an economical way to increase energy efficiency while also filling your need for a high quality gas furnace.

Sound

Carrier furnaces are designed for quiet operation and the Performance Boost 80 is no exception. How does it stay so quiet? The QuietTech™ noise reduction system, Carrier's patented combustion system, provides comfortable heat while generating very little sound in the process. And for what little sound a Carrier system does make, an insulated cabinet helps further isolate sound levels at their source. We take these extra measures because we firmly believe that your total home comfort experience should include products and systems that are easy on the ears.

Comparative Sound Ratings (decibels)

Carrier manufactures gas furnaces that are among the quietest in the industry. We test our products in a sound laboratory specifically built to resemble a typical residence. Sound level recordings produced at steady state, low fire operation (the most common operating condition), measured 3 feet from furnace. Other sound levels, mentioned for comparison, as published at <http://www.nidcd.nih.gov/health/hearing/ruler.asp>.

*As compared to the Air Conditioning, Heating and Refrigeration Institute's Standard Coil-Only Rating when paired with selected Carrier evaporator coils.

Carrier® Systems for Unmatched Performance

Humidifier replenishes moisture to dry air.

Evaporator Coil removes heat from the air as it passes over the refrigerant. The evaporator coil is located with the indoor unit and is also referred to as the indoor coil.

Gas Furnace provides reliable, energy-efficient heating for long-lasting comfort and energy savings.

Air Cleaner improves air quality by removing harmful and irritating airborne pollutants from your home.

Ultraviolet Germicidal Lamp inhibits the growth of contaminants on the indoor coil, leaving your home with cleaner, fresher indoor air.

Ventilator combines fresh outdoor air with conditioned indoor air for improved air quality – great for today's tightly constructed home.

Zoning sets different temperatures for up to eight different areas of your home for truly customized comfort and enhanced utility savings. (Requires compatible thermostat.)

Air Conditioner provides reliable, energy-efficient cooling for long-lasting comfort and energy savings. Ask about Carrier air conditioners with environmentally sound Puron® refrigerant.

Edge® Thermidistat™ Control allows precise temperature control and programmable features to further customize your comfort.

Reliability

At Carrier, your comfort is our business. That's why we have one of the most extensive product research and development facilities in the world. Within each step of the development process, from the design phase to finished products, we test each and every product to exceed industry standard requirements. In fact, Carrier engineers test the reliability of the heat exchangers to over 200,000 cycles. That's more than six times the industry's standard of 30,000 cycles.

Safety

Built by the most trusted name in the industry, Carrier furnaces heat safely within your home. Carrier pioneered the following safety innovations:

- Hot surface ignition system eliminates the need for a pilot light, reducing gas usage and promoting worry-free operation.
- The control board constantly monitors the safety devices during heating operation. If a safety device activates for any reason, the furnace will cease operation and a status code will be displayed on the furnace control board, alerting you to any potential problems.
- Blocked-vent safeguard shuts down furnace operation if vents become inadvertently blocked to protect against potential harmful gasses escaping into your living area.

Performance™
Boost80

Technology

- 1 Optional air cleaner cabinet** – allows for the easy and convenient addition of a Carrier® high-efficiency air filter for enhanced air quality.
- 2 Intelligent furnace control** – add a compatible Carrier thermostat and enjoy ComfortFan™ technology to provide the best combination of comfort and energy efficiency, helping to ensure even temperatures throughout your home.
- 3 Energy-saving blower** – the electronically controlled, programmed blower motor provides airflow optimized for your home's needs. The blower motor offers higher efficiency performance than most standard, PSC-type motors.
- 4 Slow opening gas valve** – helps ensure quiet operation and efficient, reliable performance.
- 5 Inducer fan** – precisely controls air intake within the combustion system for efficient performance.
- 6 Blocked-vent safeguard** – shuts down furnace operation if vents become inadvertently blocked to protect against potential harmful gasses escaping into your living area.
- 7 Burner ignition** – as one of the most dependable systems available, it replaces pilot lights and reduces utility consumption.

Specifications

Gas Furnaces	Infinity™ System	Humidity Control	Blower Speed	Comfort Heat Technology®	AFUE Rating	Heat Stages	SEER Boost
Infinity™ 80 Furnace	✓	Ideal Humidity System® Technology	Variable	✓	Up to 80.0	2	
Performance™ 80 Furnace		Enhanced	4-5	✓	Up to 80.0	2

Limited Warranty

To the original owner, the Carrier Performance Boost 80 gas furnace is covered by a 10-year parts and 20-year heat exchanger limited warranty upon timely registration of your new equipment.* Ask your Carrier dealer about optional extended warranties, which may include labor.

* Warranty period is five years if not registered within 90 days. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty. See warranty certificate at carrier.com for complete details.

Efficiency

80%
AFUE
RATING

APPROXIMATE ANNUAL HEATING COSTS

	Typical 10-year old 65% AFUE	Standard Furnace 80% AFUE	Performance™ Boost 80 80% AFUE
Zone 1	\$ 1,026	\$ 922	\$ 849
Zone 2	\$839	\$755	\$695
Zone 3	\$653	\$587	\$541
Zone 4	\$466	\$419	\$386
Zone 5	\$280	\$252	\$232

Calculations based on 50,000 btuh heating design, using a fuel rate of \$0.626 per therm, an electrical cost of \$0.0867 and the midpoint of the heating load hours for the zone.

To use this table:

1. Determine the AFUE of your current system.
2. From the map determine the zone you live in, enter the table and cross reference your zone with the AFUE of your current system to determine your approximate annual heating costs.
3. Compare your annual heating cost to that of a new system with a higher AFUE.
4. The difference of these two numbers is your estimated annual cost savings.
5. Heating costs include cycled fan operation. Fan costs are for fans set in ON position to run continuously. Subtract fan cost from total cost if unit is not set up to run continuously.

Energy-Efficient Gas Furnace Designed with Your Comfort in Mind

Greater Operational Efficiency

Annual Fuel Utilization Efficiency (AFUE) is like gas mileage. The higher the gas mileage or AFUE rating, the more efficient the motor vehicle or gas furnace is. Additionally, because your furnace can be an integral part of your cooling system as well, it pays to pick a furnace that can boost your cooling efficiency (SEER) during the summer months.

- The Performance™ Boost 80 gas furnace has a rating of 80% AFUE and may help reduce your monthly heating costs.
- This furnace can increase the energy efficiency of selected 13.0- and 14.0-SEER Carrier air conditioners up to 1.5 SEER.*

*As compared to the Air Conditioning, Heating and Refrigeration Institute's Standard Coil-Only Rating when paired with selected Carrier evaporator coils.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
