

Gas Furnaces – 58STA / 58STX

Carrier[®]

turn to the experts™ 

Enjoy Quiet and Affordable Comfort

Efficiency

Annual Fuel Utilization Efficiency or AFUE is like gas mileage. The higher the gas mileage or AFUE rating, the more efficient the automobile or system is. With energy costs on the rise, a Carrier gas furnace can help lower your utility costs.

- 58STA/58STX furnaces have a rating of 80% AFUE.

Things to Consider Before You Buy

Comfort

Carrier specializes in creating a customized home comfort system tailored to your needs with our broad selection of residential heating and cooling products. Your Carrier® dealer can help you choose the best system for your home including Carrier-exclusive features that further enhance your indoor environment.

Reliability

At Carrier, your comfort is our business. That's why we have one of the most extensive product research and development facilities in the world. Within each step of the development process, from the design phase to finished products, we test each and every product to exceed industry standard requirements. In fact, Carrier engineers test the reliability of the heat exchangers to over 200,000 cycles. That's more than six times the industry's standard of 30,000 cycles.

Safety

Built by the most trusted name in the industry, Carrier furnaces heat safely within your home. Carrier pioneered the following safety innovations:

- Power Heat™ hot surface ignition system eliminates the need for a pilot light, reducing gas usage and promoting worry-free operation.
- Blocked vent safeguard shuts down furnace operation if common exhaust vents become inadvertently blocked.
- Electronic control board constantly monitors the safety devices during heating operation. If a safety device activates for any reason, a status code will be displayed on the furnace control board, alerting you to any potential problems.

Sound

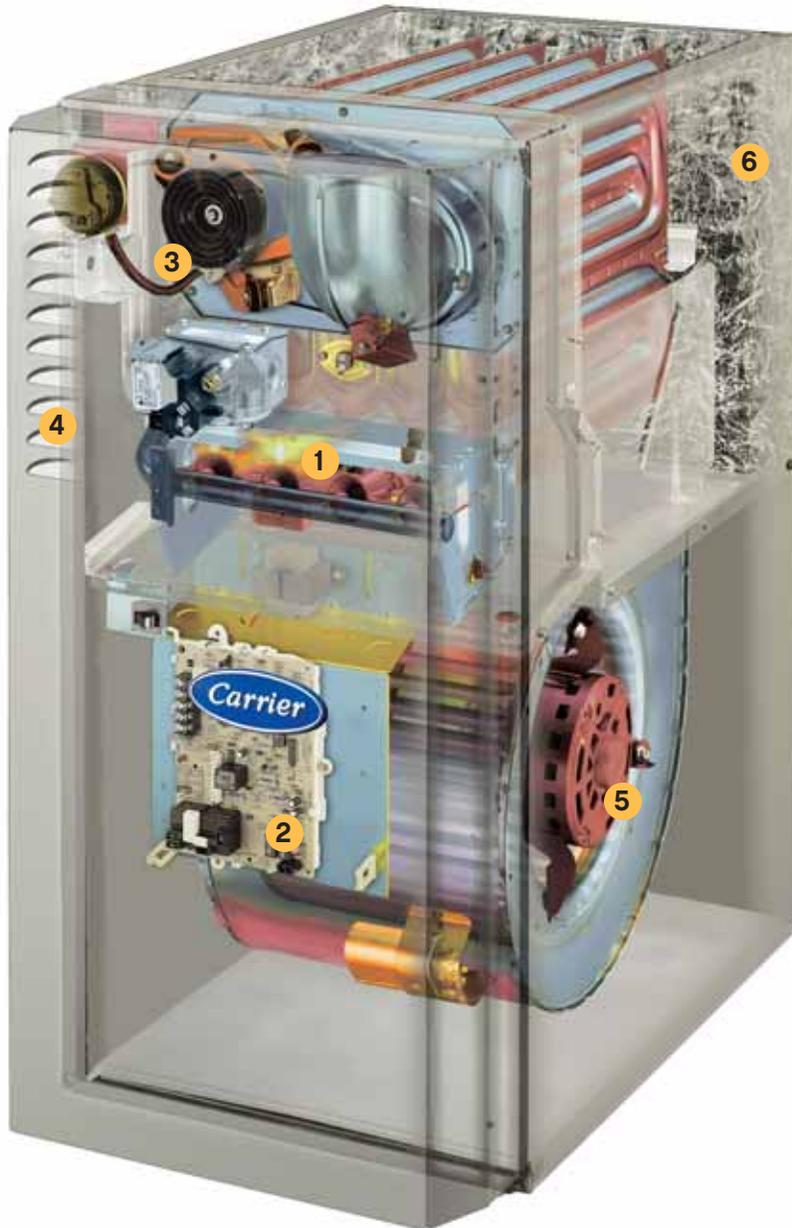

Carrier furnaces are designed for quiet operation and the 58STA/58STX gas furnace is no exception. How does it stay so quiet? The QuietTech™ noise reduction system helps to isolate sound levels at their source. At Carrier, we believe home comfort shouldn't be at your ears' expense.

Comparative Sound Ratings (decibels)

Carrier manufactures gas furnaces that are among the quietest in the industry. We test our products in a sound laboratory specifically built to resemble a typical residence. Sound level recordings produced at steady state, low fire operation (the most common operating condition), measured 3 feet from furnace. Other sound levels, mentioned for comparison, as published at <http://www.nidcd.nih.gov/health/hearing/ruler.asp>.

Technology

- 1 Burner ignition** – as one of the most robust and durable ignition systems available, Power Heat™ hot surface ignition replaces pilot lights and reduces utility consumption.
- 2 Electronic control board** – allows customized comfort with enhanced temperature maintenance and efficiency at your fingertips, and also includes a blower delay feature that helps reduce cold drafts at startup.
- 3 Inducer-fan assembly** – improves gas usage by precisely regulating and directing air intake to the heat exchanger.
- 4 Slow-opening gas valve** – helps ensure quiet operation.
- 5 Direct-drive blower motor** – delivers heated airflow into the ducts for enhanced energy efficiency and quiet operation.
- 6 Insulated cabinet** – helps reduce sound levels when the burner activates.

Limited Warranty

To the original owner, the Carrier® 58STA/58STX gas furnace is covered by a 10-year parts and 20-year heat exchanger limited warranty upon timely registration of your new equipment.* Ask your Carrier dealer about optional extended warranties, which may include labor.

*Warranty period is five years if not registered within 90 days. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty. See warranty certificate at carrier.com for complete details.

Turn to the Experts

Willis Carrier invented air conditioning in 1902. Over 100 years later, we're proud to say Carrier® systems are trusted in more homes than any other brand.

Carrier continues to be on the forefront of innovative engineering and unsurpassed standards of excellence. So when choosing a home comfort system, you'll want to turn to the experts. Your Carrier dealer will evaluate your home, such as window placement and size, ductwork, other structural specifics and lifestyle to provide a customized indoor comfort plan designed specifically for you. And when you have an expert helping you make an educated decision, you're going to feel more comfortable.
